

CK22000

Cajun Kooling

The Cajun Kooling CK22000 Evaporative Air Cooler provides cooling up to 3000 square feet with 22000CFM. The attached reservoir and 4-speed axial fan motor create an instantly cool and comfortable environment in facilities, keeping employees and animals safe during the hot months. The 46-gallon tank lasts an average of 10 hours and features an automatic shut-off sensor on the pump when the water is low. The internal mechanics are sealed tight and are heat regulated. All air intakes have dust shields to protect the cooling pads from buildup, which keeps dust circulation at a minimum. With three air intakes surrounding the fan, the CK22000 can be compact while still allowing for maximum airflow – creating a tunnel wind reaching up to 75 feet. Automatic, oscillating vertical louvers increases the radius of airflow to a potential 180 degree, rather than a limited direct air drive. The impressive CK22000 evaporative air cooler is ideal for cooling larger areas such as industrial warehouses, factories, workshops, service bays, stadiums, event venues, barns, and more. Just simply plug it in, fill it with water, and enjoy!

Information

- ▶ **For Rent: Weekly or Monthly**
- ▶ **Dimensions: 41.7x26.7x66.1**
- ▶ **Air Delivery: 22,000 CFM**
- ▶ **Air Drive: 75ft.**
- ▶ **Voltage: 110/60**
- ▶ **Current: 12 amps**
- ▶ **Fan Speeds: 4**
- ▶ **Noise: < 75 db**
- ▶ **Coverage: 3000 sq. ft.**
- ▶ **Weight: 170 lbs**
- ▶ **Water Capacity: 46 Gallons**
- ▶ **Remote Control/ 4 Heavy Duty lock wheels**
